

DTU International School Seminars

To help students learn more about corporate operations and provide them with career orientation for the future, the DTU International School held several seminars in Information Technology, Business Administration and Finance and Banking for CMU and PSU students on March 29th and April 1st.

A DTU International School seminar

Topics concerning information technology and the stock market were discussed at the seminars. Representative of the FPT Company provided students with much information about the operations of the Vietnamese stock market, so that they could better understand the general procedures. A representative of the KMS-Technology Company in Ho Chi Minh City (KMS) presented information about the operating systems of Android, IOS, and Windows Phone. By attending these seminars, students can become aware of the latest developments in the stock market and software technology.

Mr. Bui Phong talks at the seminar

Mr. Bui Phong, a representative of KMS, said: *“We want to make DTU students understand more about the necessary vital skills and corporate requirements for their future careers. If you choose a topic at the seminar to practice and research for your thesis, we will actively support you. We will always offer internships and career opportunities to qualified DTU students.”*

The seminars helped DTU students learn more about recruitment procedures and career opportunities in order for them to establish clearer objectives and hone their skills.
