# Meeting a Gifted IT Student

Nguyen Thu Quynh, in her third-year at DTU, has just been listed amongst the top 20 female IT students.

*Ms. Nguyen Thu Quynh, a third-year DTU student, listed as one of the top 20 Female IT Students*

**A Gifted Student**

Ms. Nguyen Thu Quynh, a third-year CMU student was listed as one of the top 20 national female students majoring in Information Technology. This year, she has made many fine achievements studying IT.
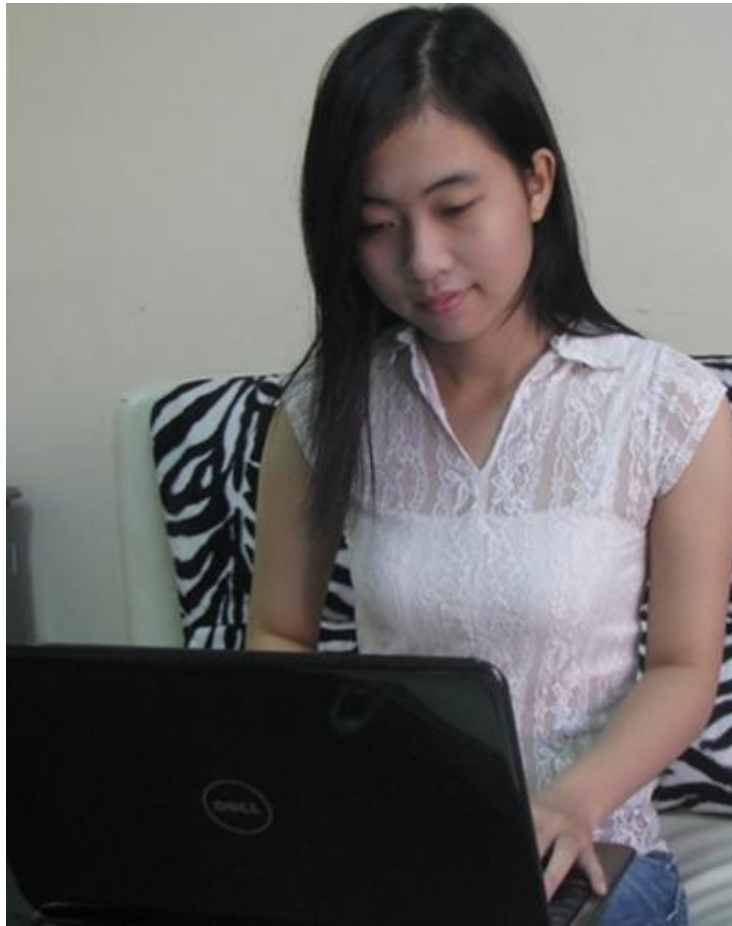

As well as scoring the highest GPA in two consecutive years, she was awarded scholarships by the DTU NIIT Center and the Boeing Aircraft Company, worth 10 million VND and $1,000 respectively. In addition, she has taken part in extra-curricula IT activities, as a website programmer at ASP.net, a video editor for AIESEC in Danang, a video editor for the GoGreen Club and as leader of  the "Danang – the Ship of Power" project in the 2012 Danang Fireworks Computer Competition.

She has studied IT since high school. According to DTU faculty members, Ms. Quynh excels in IT and English. She is also studying Japanese as a foreign language. "Good English helps me significantly in reading IT books, while my Japanese prepares me for a future career dealing with Japanese customers".

Thu Quynh also plays the piano well and she has been a volunteered for DTU Youth Union charity work in the local community and schools.

**"There is No Limit to our Thinking"**

Thu Quynh impressed us with her beautiful smile. When asked about her major, she replied: "Despite the difficulties, I will try my best to pursue my interest in IT". In her CV applying for the IT Female Student Award, she stated her belief that: "There is no limit in one's thinking except for our own".

*"There is no limit to one's thinking except our own" is Quynh's belief.*

She was one of the only two DTU students to be approved for an internship at LogiGear Danang when she finished her second year at DTU. After spending two months at LogiGear, she said: "The internship has significantly eased the tensions of my studying. Most of the materials at LogiGear are in English, which has helped me improve my English even more".

Her plan is to develop an online English study website, with exercises and video clips. Then she wants to run her own software company in the future.
