

## The 2017 International Conference on Information Systems Design and Intelligent Applications

On June 15th, DTU collaborated with the Computer Society of India and the Springer Publishing to organize the 2017 International Conference on Information Systems Design and Intelligent Applications. Eighty researchers and professors from eight countries attended.

*The conference*

The researchers shared information, their experiences and presented their latest projects in the fields of graphics and image processing, pattern recognition, decision analysis, wireless and sensor networks and medical informatics. They focused on Computer Vision and Image Understanding, Artificial Intelligence, Knowledge-Based Technology, Fuzz Theory and Computational Intelligence, Automatic Data-Driven Computation, Software Engineering and Applications, Natural Language Processing, and Machine Learning.

More than two hundred papers were submitted and ninety of the best were selected for inclusion the conference record, published by Springer.
