

The First Student Scientific Research Conference Launched at DTU

The DTU Board of Provosts decided to hold a conference on June 9 to review some of the achievements over the past two years of the scientific research program. This aim of this event was to inspire students to become more dedicated to research.

At the conference, the concept of a Scientific Research Club for Youth, advised by a board of consultants, was presented to students.

The Scientific Research Conference held on DTU's 17th Anniversary

The conference was a special opportunity to share information on various scientific research projects and proved to be a good way of promoting this important program.

The Board's objective was to use this opportunity to come up with new ideas for scientific research topics to commemorate DTU's 20th Anniversary in 2014.
